

Knowledge Category 4: Learning, Memory, and Language

Keep your “presentations” to between 2-3 minutes (in most cases) and 5 min max (this should be rare)

Broca’s aphasia other names it is known by?

caused by damage to ___ lobe and hemisphere___

How do individuals speak with this condition?

What is only “somewhat” impaired?

Self-awareness?

Wernicke’s aphasia other names it is known by?

caused by damage to _____ lobe and hemisphere___

What do they not understand?

Anomia, paraphasia, repetition.

Self-awareness?

Conduction (associative) aphasia

arcuate fasciculus – its function and what happens when damaged

what it affects and what it does not

Transcortical aphasia

caused by lesions outside of ___ which 2 structures___ that disconnect these areas from other regions of the brain.

If the damage isolates only Broca's area, what is this called and what are the symptoms

If the damage isolates only Wernicke's area, what is this called and what are the symptoms

When Broca's and Wernicke's areas are both isolated, what is this called and what are the symptoms

Global aphasia

What is it caused by?

What is it characterized by?

Which three conditions associated with the **right** hemisphere are frequently seen in people with global aphasia?
