

Module 1

BRAIN ANATOMY AND PHYSIOLOGY

- Medulla
- Cerebellum and Ataxia
- Reticular Activating System
- Thalamus and Wernicke-Korsakoff Syndrome
- Hypothalamus and Suprachiasmatic Nucleus
- Basal Ganglia
- Amygdala and Kluver-Bucy Syndrome
- Hippocampus
- Corpus Callosum
- Contralateral Representation
- Brain Lateralization/Split-Brain Patients
- Frontal Lobe and Broca's Area/Prefrontal Cortex
- Parietal Lobe and Apraxia/Anosognosia/Gerstmann's Syndrome
- Temporal Lobe and Wernicke's Area
- Occipital Lobe and Visual Agnosia/Prosopagnosia
